data processing Index Vol 25 Nos 1–10

TITLE INDEX*

Books reviewed**

Advanced COBOL, A S Philippakis and L J Kazmier. *Reviewed by W Gwillam* (1)33
A Manager's Guide to Local Networks, F Derfler and W Stallings. *Reviewed by A Lepper* (10)42
Annual Bibliography of Computer Oriented Books (6)43
A Unix Primer, A Nicols and N Lomato. *Reviewed by B Williams* (9)43
Automated Materials Handling: Proceedings of the First International Conference (1983), R M Hollier. *Reviewed by S Liff* (8)42
Brave New World (2)33
Computer Insecurity, A Norman. *Reviewed by D Albury* (10)42
Computerization of Working Life, E Fossum (ed) (7)43
Computer Network Architectures, A Meijer and P Peeters. *Reviewed by P Garratt* (3)40
Computer Programming in COBOL, M Fisher. *Reviewed by P Skinner* (2)32
Database Management Systems: A Guide to Microcomputer Software, D Kruglinski. *Reviewed by C Wimlett* (6)43
Decision Support Systems for Effective Planning and Control, R J Thierauf. *Reviewed by R Harper* (7)42
Electronic Office Monitor, D Pedder (ed) (2)32
Encyclopedia of Information Systems and Services, J Schmittroth Jr (ed) (6)43
Guide to Money for Microchips, M Scicluna and R Garratt (9)42
Human Error in Computer Systems, R W Bailey. *Reviewed by A Lepper* (10)42
Information Systems Design, Brookes, Grouse, Jeffrey and Lawrence. *Reviewed by A Lepper* (2)33
Information Systems in the 80s, U Weil (4)42
Management Control of Data Processing, W H Inmon. *Reviewed by A Lepper* (8)43
New Technologies, New Policies, J Howkins. *Reviewed by M Bruce* (3)41
Pascal under Unix, J N P Hume and R C Holt. *Reviewed by P Hackney* (10)42
Perspectives on Information Management (1)32
Privacy in the Computer Age, S L Simons. *Reviewed by A M Lepper* (5)42
Programming Embedded Systems with Ada, V A Downes and S J Goldsack. *Reviewed by C Wimlett* (5)42
Rich's Guide to Santa Clara County's Silicon Valley (5)43
RPG II and RPG III with Business Applications, S E Myers. *Reviewed by R Harper* (5)43
Structured COBOL, D Schechter and G Yvkoff. *Reviewed by P R Brown* (1)32
Structured Systems Development Techniques: Strategic Planning to System Testing, G Collins and G Blay. *Reviewed by J A Kirkham* (4)42
Systems Development, M A Jackson. *Reviewed by T G Gough* (3)40
The Programming Languages Pascal, Modula, CHILL and Ada, C H Smedema, P Medema and M Boasson. *Reviewed by C Wimlett* (9)42
Towards Fifth Generation Computers, G L Simons (8)43
VAX BASIC, D Weinmann and B Kursham. *Reviewed by P Hackney* (7)43
Viewdata and the Information Society, J Martin. *Reviewed by M Bruce* (3)41
Word Processing Security Guidelines, R T Dowsell. *Reviewed by C Wimlett* (7)42
1983 Guide to Small Business Computers and Word Processing Systems (1)33

*Numbers in brackets refer to issue numbers.
**Where no reviewer is mentioned, books have been reviewed by K Dembo, assistant editor.

Applications

Advanced techniques for warehouse automation (8)38
Automation grows in international banking (2)27
Business graphics set for rapid growth (6)29
Choosing a payroll package (8)34
Computer control of whisky production (8)31
Continuing the search for oil (3)21
Data acquisition during oil production (3)23
Decision support systems for manufacturing (10)37
Developing software inhouse (3)20
Digital computers in time-critical simulation (9)30
Electronic journal experiment (5)34
Graphics in accounting (6)32
High quality electronic printing (5)28
Integration in business (10)40
Japan uses Western manufacturing systems (10)39
Less waste in the warehouse (8)36
Potential for micros in production control (10)35
Publishing in the DP department (5)31
Small manufacturing businesses (10)32
Systematic use of robots (2)19
Trends in banking (2)24
Using graphics to communicate (6)34
3-D graphics in batch production (7)35

Communications

Bright future for modems and multiplexers (1)30
Conferences by satellite (3)29
Distributed networks (7)28
Distributed processing through LANs (7)33
Euronet DIANE — the European online information network (5)16
Integrated links on land and sea (3)27
Interfacing LANs to WANs (4)26
International standards for teletex (10)21
Local area network developments in the UK (4)23
Managing information movement (2)13
Multinational network management (2)16
Network management systems (2)18
PABX approach to office automation (5)11
Project Universe (4)28
Satellites for offshore comms (3)26
Speech and data through a PABX (5)14
Teletex terminals (10)25
User view of LANs (4)19

Ergonomics

Office dangers — glare and noise (5)9
True ergonomic design for users (5)6

Law

Computer based evidence — how it stands up in court (6)23

Office automation

Caught between two stools (1)11
Choosing an IP system (10)19
Dedicated word processing (10)13
DP managers play a crucial part in effective OA strategies (8)6
Flexibility, not productivity (8)12
Integrating WP and DP (1)17
More effective use of minicomputers (1)14
Planning for office automation (8)10
Word processing within data processing (10)17

Policy

Adapting office life to new technology (6)14
Capacity management (2)6
Career paths in a changing world (9)6
Changing role of programmers (4)10
DP and user roles in capacity planning (2)9
Effects of IT on employment (4)12
Evolution of the DP manager (1)6
Experts will change the DPM role (7)21
Finding the right staff (9)14
Future challenges for computer operators (4)6
Human resources management (7)6
Increasing software productivity (7)16
Information technology in the European Community (3)11
Learning from software maintenance (10)6
Looking at problems through technoscopes (3)13
Management style in new information environments (4)15
Manpower planning (9)12
Opportunities for women (6)22
Project control and professional development (7)12
Project management techniques applied to computing (7)9
Protecting software against piracy (3)6
Software security (3)9
Support of installed applications (10)10
Survey finds few women in DP management (6)17
Successful consultancy (9)19
Successful DP management (1)9
Text structuring (8)18
User involvement in system design (6)6
Women managers at work (6)20
Working at working together (9)16

Profile

Computerization in South Asia (8)14
Five year target for France (9)37
IBM strategies (9)34
Japan aims for selfsufficiency (3)37
Polishing the corporate image (1)27
Singapore aims to catch Japan (6)38
Softly, softly, making sales (7)37
US computer industry — growth despite recession (5)37
West German computer industry (?)24

Software

Software production (1)22
Software standards (1)19

Systems

Computer strategy planning (7)24
Designing microprocessor-based systems (9)26
Fault tolerant computers (10)28
Future developments in disc storage (8)28
Getting carried away (9)21
Interfaces in real-time systems (6)36
Large mainframes into the next century (5)19
Merging facsimile and Teletex (8)24
Processing images by computer (8)21
Using COM inhouse (5)27

Systems software

Programmers join the software cottage industry (3)18
Solving the software bottleneck (2)29

Terminals

Flat panel displays (4)36
Impact printing becomes faster and quieter (3)33
Intelligent terminals in metals dealing (4)33
Local intelligence for the user (4)31
Portable micros in data collection (4)39
Touch sensitive screens (4)34

AUTHOR INDEX
